

## REMARKS

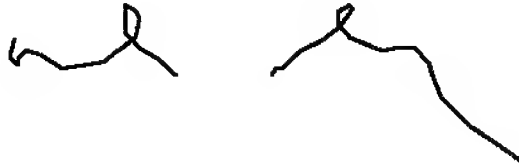

Claims 1-9 and 11-17 were rejected under 35 U.S.C. 103(a) as being unpatentable over Yahr (U.S. Patent No. 4,820,290), and further in view of Velaquez (U.S. Patent No. 6,699,226).

In response, Applicant has amended the claims to focus on the main body being configured in the shape and contour of the head of the user's penis to form fit the head of the user's penis, such that the top of the main body is longer than the bottom of the main body. The figures as originally filed clearly show the new limitations, especially Figure 1 – the side view. This structurally separates the present invention from the cited art because Yahr shows merely a bulbous device that is not contoured to the shape of the penis at all. Yahr merely fits over the head of the penis but there are several gaps between Yahr and the head of the user's penis... and this is simply because Yahr, as shown especially in Figure 1 and Figure 6, is bulbous as opposed to being shaped and contoured to the head of the user's penis as is the present invention. Further, Velaquez, as shown in Figures 3a – 3e, shows a bulbous device that is not contoured. Velaquez doesn't even extend to cover the entire head of the user's penis (see Figure 3d left side where Velaquez falls short of reaching the sulcrus).

Applicant has added no new matter, as such was already shown and/or described in the text and figures of the original filing. Respectfully, neither Yahr nor Velaquez present a device with the limitations that are now in the claims.

Any extensions of time are hereby requested. *Please charge all fees due and owing to Deposit Account No. 500356 in the name of A + Legal Services - Greenberg & Lieberman.*

Respectfully submitted,

A handwritten signature in black ink, consisting of a stylized 'M' followed by a long, sweeping horizontal line that ends in a small upward flick.
